Held annually in the Vecchi Macelli area of Pisa, Lus: Experiments Under the Tower aims to explain scientific concepts in an engaging manner through a collection of around 50 games and experiments.

A team of young scientists and researchers introduce visitors to the world of science and technology. Following a step-by-step demonstration, children and adults are invited to reproduce a series of physical phenomena that affect our daily life.

Full details of this year's event can be found on the Ludoteca Scientifica website. Bookings are necessary.
